Backend Development

Cybersecurity

## PROFILE

Ever since I was little, I was interested in how computers work and I tried to improve myself in this field. It has always been captivating for me to read and research documents related to hardware, software and computers, along with the courses I have received online, the software languages I have learned, my researches and the projects I have developed as applications. I want to gain experience and contribute to the realization of a project. I want to continue my career and life as a software developer and IT. The biggest feature that I have been playing chess for years and the department I have been reading has been the development of my analytical intelligence. In this way, I learned to solve complex problems in the shortest way and to develop a different perspective in the face of problems. I am extremely open to learning, development, criticism and group work. I am doing my best to improve and raise myself and I will continue to do so.

## EMPLOYMENT HISTORY

### Frontend Web Developer, Varsapp

Mar 2021 — Jun 2021

### Licensed Chess Arbiter, Turkey Chess Federation

2018 — Present

### Chess Trainer, Private College and Public Schools

2018 — Present

I worked at Private Cent College and Ismail Erez Primary School and Ferit Aysan Primary School. I'm still working at Private Cent College.

## EDUCATION

### Bachelor of Science in Physics (eng), Yıldız Technical University

2019 — Present

I'm a senior and I will be graduating in 2023.

### Bachelor of Science in Chemistry (eng), Hacettepe University

2017 — 2018

Since the department didn't unleash my potential so I switched to the Physics department because I wanted to study in a numerically heavier department that covered most of the engineering fields and aroused my curiosity.

### Primary and Highschool (%100 scholarship), Private Cent College

2009 — 2017

The school provides education in English.
